

TRAVEL IN *Style*

Travel in Style – by Bonnie Roseman

If there's anything I've learned in my 35 years as a stylist, it's to "carry on," and by that of course, I mean take a carry-on bag!

In order to make travel easier for my busy clients, I've spent years developing techniques to make traveling simple and fun.

A carry-on bag is key to making your journey more enjoyable; no more hauling multiple bags, or worrying about losing your luggage, which can ruin your trip before you even begin!

In my most recent trip abroad, I traveled to the Scandinavian countries before flying to Greece for a little sun in the Cycladic Islands. After that, it was off to Italy and over the Alps. All the while, I had just one bag with me.

To make the most of your luggage space, I suggest you wear your jeans and sneakers, and carry your leather jacket while you travel, to save space in your bag.

Roll all items tightly! It saves space, and keeps everything from wrinkling. I usually prefer to stuff my undies and socks in my shoes. Select pieces with fabrics that can wash and hang to dry without needing to be pressed – it's easier to keep things fresh and avoid using foreign cleaners that can be very expensive.

Here are the basics for 6 weeks of traveling abroad across different climates. This short, gender-neutral list includes the basics for a great travel wardrobe. I recommend that your main wardrobe color for travel be black. It looks slimming on everyone, and doesn't show dirt as easily. A few colorful tee tops can be added to give a little zip to your ensemble. All of these items will fit into your carry-on luggage and provide options for mixing and matching stylish looks while you see the world. You can then personalize your list by adding your toiletries, gloves, hat, or other essential accessories as needed.

Feel good, and look even better!

Please contact me personally if you have any questions or would like to see my unique travel collection which can be dressed up or down.
